EASILY CREATE MOVIES FOR THE WEB, MOBILE DEVICES, DVD'S & COMPUTERS!

MOVIEWORKS®

MovieWorks allows anyone to easily create high-quality multimedia projects for the web, mobile devices, DVDs & computers! Its main differentiating factor is that it offers more creative flexibility and timing control than the entry-level movie, slide show and presentation software programs currently available in the market today. Unlimited layers are supported so you can put any number of movies, pictures, graphics, text and titling, animations and other media objects anywhere on the screen. Furthermore, MovieWorks provides a powerful media Sequencer window allowing the precise timing of when these objects appear and disappear in your production. MovieWorks' intuitive interface and comprehensive feature set allows users of all ages to create multimedia projects that rival those created with expensive, complex applications, at a fraction of the cost, time and learning curve!

FIVE PROGRAMS IN ONE

MovieWorks, the main application of the suite, works seamlessly with the included basic Sound, Paint/Photo, Video and Animator applications. Import, animate, position and sequence an unlimited number of media "Objects".

EASY & FLEXIBLE DISTRIBUTION

Export finished productions in a variety of industry standard formats including QuickTime, MPEG-4, AVI, DV and others. Playback on a computer, DVD player, iPad or other tablet, iPhone, AppleTV or web page.

OBJECT-ORIENTED SCREEN LAYOUT

Create sophisticated multimedia productions up to 3840 x 2160 (4K) in size. Objects may be layered in any order and positioned anywhere on the screen. Line them up using the alignment options or use the Coordinates window and Arrow keys for precise positioning.

Animation

Movies & Mobile Content

Training

Presentations

MULTI-TRACK, TIME-BASED SEQUENCER

Easily edit the duration and start time for your media objects by simply resizing and/or moving their corresponding timebars in the Sequencer window. Quickly Auto-Sequence multiple Objects.

LEARN IN ONE HOUR

Numerous tutorials and training movies are available on the MovieWorks website. Some may be downloaded and others viewed online. Themes are Wild Africa, Thomas Edison, Treasure Hunting and more!

ANIMATION & EFFECTS

Move any Object on a path with the animation tools, add time-based scaling and layering effects, and scroll text. Extensive transitions library including zoom, wipe, dissolve and many more.

SYSTEM REQUIREMENTS

- Mac OS X 10.9 or better • 8 GB of memory • 2 GB of hard drive space
